PROFESSIONAL SUMMARY

AI Automation Engineer with 2+ years of client delivery experience turning manual sales, support, and marketing work into 24/7 automated systems. Specializes in GoHighLevel CRM administration: end-to-end workflow automation (lead capture, routing, qualification, call booking, human handoff, re-engagement), pipeline management, CRM data hygiene, lead scoring, attribution tracking, and automated reporting. Ships automations with zero silent failures — queue-based architecture with deduplication, retries, and error alerts across n8n, Make.com, Zapier, and native CRM workflows. Sub-10-second speed-to-lead, automated appointment scheduling with SMS/WhatsApp reminders, and weekly performance reporting packs for stakeholders.

CORE SKILLS & TECHNICAL KEYWORDS

Third-Party Tools & Integrations: Retell AI, Vapi, Bland AI, ElevenLabs (voice AI platforms), Apollo.io, Clay, Hunter.io, Phantombuster (lead enrichment), Instantly.ai, Smartlead, MillionVerifier (cold email & deliverability), Calendly (scheduling), Typeform, JotForm (forms & lead capture), DocuSign, PandaDoc (e-signature), Slack, Telegram (alerts & bots), Stripe (payments & billing), ClickUp, Asana, Notion (task & project automation), Shopify, WooCommerce (e-commerce automation), QuickBooks (accounting integration)

CRM & Sales Operations: GoHighLevel (CRM admin, workflows, pipelines, triggers, custom fields, snapshots, sub-accounts), Salesforce & HubSpot (familiar), CRM data hygiene, deduplication, lead capture & enrichment, lead scoring & routing, pipeline stage management, owner assignment, stale-opportunity re-engagement, next-step hygiene, attribution & campaign tracking, automated reporting

Automation & Integration: n8n (queues, sub-workflows, error handling, webhooks), Make.com, Zapier, REST APIs, webhooks, OAuth, scheduled jobs, event-driven architecture, zero-silent-failure design (retries, deduplication, error alerts)

AI / LLM Engineering: AI voice agents (Twilio), AI chatbots (WhatsApp Business API, Meta Graph API, web chat), RAG pipelines (chunking, embeddings, pgvector), OpenAI & Claude APIs, tool calling, prompt engineering, AI reply classification, call summaries & transcripts

Data & Backend: Python, JavaScript, SQL, PostgreSQL, Supabase, Airtable, Google Workspace APIs, Google Ads / GA4 / Search Console / Meta Ads APIs, Google Calendar API, Apify (web scraping), Git

PROFESSIONAL EXPERIENCE

AI Automation Engineer — Sybrid (Pvt.) Ltd. — Islamabad, Pakistan *Jun 2026 – Present*

- **CRM automation owner.** Own the GoHighLevel CRM automation layer for multiple service-business clients — designing, deploying, and maintaining production workflow suites covering lead capture, AI qualification, call booking, human handoff, and review/retention flows.
- **Speed-to-lead automation.** Built a multi-channel AI lead engagement system (WhatsApp, Instagram, Facebook Messenger, web chat) achieving sub-10-second speed-to-lead, 24/7 — every inbound message auto-qualified, routed, and logged to the CRM pipeline in real time.

- **Zero-failure integrations.** Engineered a queue-based integration architecture on n8n + Supabase with deduplication, retries, and error alerts — zero message loss and zero silent automation failures under high inbound volume; full conversation memory with clean human handoff into GoHighLevel.
- **AI voice & appointment automation.** Developed AI voice agents that answer inbound calls, qualify leads, book/reschedule/cancel appointments live on calendars, and write call summaries and transcripts back to the CRM — with missed-call text-back, urgent-call transfer, and no-show reduction via SMS/WhatsApp confirmations and reminders.
- **Pipeline & data hygiene.** Enforce CRM data hygiene across client accounts: automated deduplication, field normalization, lead enrichment (website, email, socials, reviews), and lead scoring so every opportunity carries an owner, a source, and a next step.
- **Automated reporting.** Built automated weekly reporting for clients — pulling ad, traffic, and SEO data (Google Ads, Meta Ads, GA4, Search Console), generating AI-written plain-English insights and branded reports delivered by email, plus real-time Slack alerts on spend spikes, conversion drops, and ranking falls.
- **Knowledge automation.** Created an agentic RAG knowledge assistant (PDFs, spreadsheets, cloud files; automated chunking, embeddings, pgvector, metadata filtering) replacing static documentation with instant AI answers.

SELECTED PROJECTS

Sales Operations Automation Suite — GoHighLevel *2026*

GoHighLevel · n8n · Webhooks · Supabase · Slack · Google Calendar API

- Full-funnel sales-ops automation: form-fill capture with instant owner assignment, speed-to-lead SLA workflows with missed-SLA escalation alerts, AI call-summary processing that updates the opportunity, next step, and contact fields automatically.
- Pipeline hygiene engine — flags opportunities with no activity for 21+ days, auto-nudges owners, and re-engages stale leads; every opportunity carries accurate lead source, campaign, and owner from creation.
- Weekly reporting pack auto-generated and delivered: speed-to-lead, show rate, rebook rate, pipeline stage aging, and automation health (zero silent failures verified per run).
- Wait-and-reply DM handling, human-handoff workflows with full context transfer, and workflow monitoring with dead-automation detection.

AI Receptionist for Local Businesses *2026*

Voice AI · Twilio · n8n · OpenAI · Google Calendar API · GoHighLevel · Supabase

- 24/7 AI phone receptionist for clinics, salons, and home-service companies: answers FAQs, books/reschedules/cancels appointments live on the calendar, and sends SMS/WhatsApp confirmations and reminders to cut no-shows.
- Missed-call text-back recovers lost leads automatically; urgent calls transfer to staff with full context; weekly dashboard of calls, bookings, and recovered leads synced to the CRM.

Lead Generation & AI Outreach Engine *2026*

Python · n8n · Google Maps / Apify · OpenAI · Instantly / Gmail API · Airtable · GoHighLevel

- Finds businesses by niche and city, enriches them (website, email, socials, reviews), scores fit, and writes a personalized cold email per lead based on its website and reviews.
- Runs multi-step email sequences; AI classifies replies (interested, not now, unsubscribe) and books interested leads straight onto the sales calendar and CRM pipeline.

CRM Data Hygiene & Lead Enrichment Pipeline *2026*

Python · n8n · Supabase · Clearbit-style enrichment · GoHighLevel API

- Nightly CRM audit job: deduplicates contacts, normalizes phone/email/company fields, merges duplicates with field-priority rules, and flags records missing owner, source, or next step.
- Enrichment layer appends firmographic and contact data, computes a lead-fit score, and pushes scores plus routing rules back into the CRM so high-value leads hit the right owner instantly.

Automated Client Reporting System for Agencies *2026*

n8n · Google Ads / Meta Ads / GA4 / Search Console APIs · OpenAI · Google Slides API · Gmail · Slack

- Pulls ad, traffic, and SEO data for every client each week; AI writes plain-English insights and next steps; branded reports generated and emailed automatically — replacing hours of manual reporting per client.
- Real-time Slack alerts on spend spikes, conversion drops, and ranking falls so issues are caught before clients notice.

EDUCATION

Bachelor of Science in Data Science — National University of Sciences & Technology (NUST), Islamabad *2024 – 2028 (Expected)*

- Relevant coursework: Data Structures, Databases, Machine Learning, Artificial Intelligence, Statistics, Linear Algebra, Data Visualization (CS 366).

CERTIFICATIONS & TRAINING

- GoHighLevel Certified — Advanced Automations & AI
- **Platform expertise.** Twilio / WhatsApp Business API integration; Meta Graph API for Instagram & Messenger automation.
